

## PRODUCT DATA

### Fal-ST4600

**Description** Fal-ST4600 is a blend of neutralizing amines, based on Cyclo Hexylamine used to correct the pH of condensate and prevents corrosion in steam condensate systems.

Fal-ST4600 has been developed to provide both near-end and Far-end protection.

**General Description** Appearance : Luminous green liquid  
pH : 12.5  
Specific gravity : 0.97 approx.

**Treatment And Dosage** Fal-ST4600 dosage rate is dependent on the level of CO<sub>2</sub> present in the steam. The optimum dosage rate will be specified by **Falcon Representative**.

Fal-ST4600 should be diluted with clean water and injected continuously by metering pump.

**Product Benefits** Minimizes condensate corrosion.  
Good thermal stability.  
Protects near-end and far-end.  
Water soluble.
