

PRODUCT DATA

Fal-SUL2000

Description Fal-Sul2000 is a catalyzed sodium Meta bisulphite compound, Which reacts with oxygen to form sodium sulphate. Protecting The boiler from corrosion problems. It also contains Anti scaling Polymer and a neutralizing amine to prevent scale formation and to protect the condensate line as well.

General Description	Appearance	: Colorless liquid
	pH	: 4.0 (5.0 in solution)
	Specific gravity	: 1.24
	Odor	: Sulphide odor

**Treatment
And Dosage
Requirement** The optimum dosage for Fal- Sul2000 depends on boiler pressure, temperature and other operating conditions.

The optimum treatment level will be specified by your Falcon Egypt Representative to ensure the maximum program performance.

Fal-Sul2000 is normally diluted and injected by means of a dosing Pump or a dosage pot as appropriate to the particular plant.

Package 30 kg
